

February 12, 2010

Dear Pastor,

Greetings in the name of Jesus, the only name given under heaven whereby we must be saved. I pray that all is well in your church and that you are experiencing the flow of His spirit in your services. Because, when God is in our midst, great things are possible. You are probably just getting settled into this new year and relaxing after the busy holidays, thankful that life does slow down somewhat, although briefly.

I would like to thank each of you that shared in any of the events, that made 2009 a success for the Sunday school department in the Kentucky District. Your involvement is important, whether it is in Junior Youth Camp, Bible Quizzing, Children's Crusades or any of the other events that make Sunday school exciting!

I do need to let you know that Section U was not well represented in SOC giving for the year of 2009. I want to remind you of how important we all are working together as a team to be successful. I do understand that the economy has affected us all and that we have had to rearrange and perhaps reconfigure our budgets. I am asking a big favor from the pastors of Section U this year and that is simply commitment to our children. I would like to have 100 percent participation in SOC from "Our Section" this year. I really would like to break some records, but if we don't break any records 100 percent participation is our goal.

Games are not won from the bench, or the sidelines, neither will our success come from that direction. But as we each do our part, it will all come together and be a great success. You may not feel like your part is large enough to make a difference, but let me reassure you that each of you are important and that you do make a difference. Your prayers are important, your giving is important, your involvement in Sunday school events is important. Important enough, to make a difference, in the life of our children. Thank you for your commitment to the children of Section U.

Yours in Christ,

Barry R. Coomer
Section U Sunday School Director
